

Freecom CardReader 9-in-1

Mobile CardReader, transfers pictures, music, video and other data between flash memory cards and your computer

Freecom CardReader 9-in-1

- Freecom 9-in-1 Mini Card Reader/Writer is a Hi-Speed USB 2.0 Multi-card Reader/Writer that connects to your computer's USB 2.0 port. USB 2.0 provides superior performance to transfer pictures, music, video and data between flash memory cards and your computer.
- Because USB 2.0 devices are backwards compatible with USB 1.1 ports, the Freecom 9-in-1 Mini Card Reader/Writer will work with all existing USB ports. The CardReader provides the ability to write data to and read data from flash memory without connecting your digital device (digital camera, handheld computer, digital music player, etc.) directly to a computer.
- Including Roxio PhotoSuite software to enhance and organize digital photos. Browse and view your media fast and efficient. Describe, tag and rate and search for photos. Create slideshows and burn it onto a VideoCD.
- Data transfer activity LEDs help avoid data errors or loss due or incorrect media removal.
- All four memory slots are active at the same time, which allows you to copy data directly from card to card.
- The Freecom 9-in-1 CardReader accepts the following memory types: Smart Media Card, Compact Flash Type I, Compact Flash Type II, MicroDrive, MemoryStick, MemoryStick Pro, MultiMedia Card, RS-MultiMedia Card.
